

"30" LOCOMOBILE

THIS SHAFT-DRIVE CAR, WHICH HAS JUST BEEN RECEIVED AND IS NOW ON EXHIBITION AT THE SCHUMAN GARAGE IS A TRIUMPH FOR THE ENTIRE AMERICAN AUTOMOBILE INDUSTRY—A TYPICAL DEMONSTRATION OF AMERICAN SKILL AND PERSEVERANCE.

The LOCOMOBILE is the most RELIABLE car on the Market. It will run day after day, month after month, and year after year with a minimum of care and expense. In DURABILITY it will hold its own against any car in the World. The LOCOMOBILE has an unmarred reputation for SAFETY. There is no record of any accident or injury from the breakage of any part of any LOCOMOBILE CAR. The DESIGN of the LOCOMOBILE is best because it is along approved and accepted lines. The MATERIAL used in the construction of the LOCOMOBILE is the best to be procured. No less than sixteen grades of high quality steel are employed. A notable feature is the use of special formula bronze at important points. In CONSTRUCTION the LOCOMOBILE is a BUILT Car as distinguished from an ASSEMBLED Car. The LOCOMOBILE is the EASIEST and STEADIST riding of motor cars because it is specially designed for varying roads.

The "30" Locomobile 5 Passenger Touring Car. Also made in 4 passenger Roadster or Baby Tonneau body.

THE ONLY AMERICAN CAR WHICH EVER WON AN INTERNATIONAL RACE FOR ENDURANCE, AS IT DID IN THE VANDERBILT CUP RACE, LOWERING ALL PREVIOUS RECORDS MADE AND GOING 258 MILES IN 240 MINUTES WITHOUT STOPPING.

A new Shaft-Drive Model. Special attention is directed to the easy riding qualities of this model, its smoothness of operation, and to the novel and desirable shaft-drive system thoroughly developed through years of road testing. The front seat is divided; the rear seat is 51 inches wide, affording ample room for three passengers. The wheel base is 12 inches, yet the car can be turned in a 39-foot street without backing. Another special feature is the low Tension Ignition which prevents water or moist air affecting its working safely and smoothly.

SPECIFICATIONS:

CHASSIS: "30" standard type.
Wheel base: 120 inches.
Extreme length: 15 feet, top down.
MOTOR: Four-cylinder, water-cooled.
Cylinder bore: 4½ inches.

HILO WELCOMES CONGRESSIONALS

HILO, September 9.—The wharf was thronged with Hilo folk yesterday evening when the Mauna Kea made fast with the Congressmen and their families who have come all the way from Washington to have a look at the Big Island of Hawaii.

It was a happy crowd too, those on board looked as happy as those on shore felt. As the steamer approached the wharf, the Hilo Band played a cheerful march followed by "America." in response came some Hawaiian music from a Hawaiian glee club. As soon as the gangplank was lowered, the Hilo lei girls headed by Mrs. Abbie Maguire went aboard and on to the upper deck where every visitor was smothered in malle and beautiful rose leis. The young ladies were:

Mrs. Abbie Maguire, Misses Ruby Pua, Amy Williams, Josephine Kallenul, Emily Ewaliko, Amy Ah Hin, Keahi Nalimu, Annie Lewis, Emma Lewis, Edna Akau, Alice Hattie, Mrs. W. Stone, Gertrude Willfong and Lydia Macy.

As soon as the visitors stepped ashore they were welcomed by the reception committee headed by Mr. and Mrs. Holmes. They boarded the train and were quickly brought to the Hilo Railroad depot whence autos and hacks were waiting to whisk them away to their temporary homes.—Herald.

THE LUMBER INDUSTRY.

Manager Sam Johnson of the Pahoa lumber mill has prepared a statement of the lumber industry for the Congressional visitors.

Since April 1 the mill has turned out 90,407 standard railroad ties and about 622,662 feet of small ties and 101,202 feet of lumber. The daily output is gradually increasing.

The mill also operates its own plant for building cars and repairing its machinery. There are about 10 miles of railroad track and the company operates four locomotives, two large and two small, forty-five cars and nine logging donkeys.

Silva's Toggery are just in receipt of a new line of Hart, Schaffner & Marx white serge suits cut in the latest style. These suits are as comfortable and as cool as they look.
